### Notes:

#### No. 1

Voters on Biometric Register refer to Voters who will be biometrically verified on Election Day.

#### No. 2

Special Voters refer to Voters who have Special Duties on Election Day and for that reason are allowed by law to vote earlier than the Election Day. They include Security Agencies, Media Personnel and EC officials.

#### No. 3

Voters without biometric data refer to voters who registered but whose biometric data got corrupted for one reason or other. They will be manually verified on Election Day.

#### No. 4

The total number of valid voters for the 2024 General Election is: 18,774,159.

A = 18,640,811 (Voters with Biometric Data)

B = 131,478 (Special Voters)

C = 1,870 (Voters without Biometric Data)

Thus,  $A + B + C = 18,774,159$  Valid Voters.

#### No. 9

The total number of Absent Voters should equal the sum of Special Voters plus Transferred Voters. However, a number of Polling Stations were administratively closed, either because they did not meet the minimum voter threshold required for operation or because local communities requested the Commission to close the Polling Stations for legitimate reasons. Voters from these closed Stations were Transferred to other Polling Stations.

Since no Register was generated for these closed Polling Stations, no Absent Voters list was created for them, resulting in 884 voters excluded from the Absent Voters List. Their records, including details of their movement, are securely maintained within the Voter Management System, ensuring full accountability.

Total Absent Voters = (Special Voters + Transferred Voters) – 884 Voters.

Thank you.
